

Boiler Health Plan

Keeping up with scheduled maintenance and inspections, as required by the manufacturer, is important in maintaining your boiler. Not only do our Health Plans help maintain warranty protection, they also prevent problems that can arise during winter months when you need your boiler to function at its best, as well as increasing the energy efficiency of your home.

Alpha Plumbing Certified Technicians will utilize a thorough checklist to perform inspection and cleaning yearly to ensure your boiler is working optimally!

Our Boiler Health Plan includes:

- ✓ Overall system inspection
- ✓ OEM maintenance kits supplied and installed
- ✓ Combustible gas leak check, performed with combustible gas meter
- ✓ CO spillage and detection inspection
- ✓ Boiler cabinet inspection and dust removal
- ✓ Burner cleaning, inspection and debris removal
- ✓ Flame rod and thermocouple cleaning, inspection, & debris removal
- ✓ Venting system inspection combustion analysis
- ✓ Pressure system safety check
- ✓ Ignition system safety check with proper spark and flame rectification

Costs vary by model, and range from \$350 to \$1000 +GST. Book an inspection with a certified technician today to get your Boiler Health Plan started!
